### Fountain Powerboats Performance Disclaimer

Be advised that performance figures are merely an estimate, not a guarantee, of what you can expect based on our factory testing program. The above listed speeds are verified by radar or GPS or both with one test driver and less than a forty (40) gallon fuel load. Boat speeds and range can vary depending on weight, fuel load, number of passengers, air temperature, altitude, humidity, barometric pressure, water conditions, wind, engine tuning, horsepower (HP) variance from engine to engine, propellers, and numerous other factors beyond our control. Fountain Powerboats reserves the right to make changes on standard and optional equipment at any time without prior notice. Useable fuel in a gas tank may be slightly less than the advertised fuel capacity. Speed variance can be up to 4% of the top speed.

### Fountain Powerboats Options Disclaimer

Fountain Powerboats reserves the right to make changes on standard and optional equipment at any time without prior notice. Some options may have changed since the print date of this material.
